

NEWS FROM THE CUTTING EDGE

Helpful Tips From The Professionals At Hyde IBS

The holidays are approaching and if you are looking to get someone special in your life a great gift, Hyde IBS has a special promotion on our seafood blades that can't be beat. Who wouldn't want a new 200 mm stainless seafood blade in time for the A-Season of fishing?! See the article below or visit us at the IPPE Show in January or the Boston Seafood Show in March!

We hope you'll find something of interest to you and your business in this issue of The Cutting Edge. We'd like your feedback on what you would find helpful in upcoming issues. E-mail us at info@hydeblades.com

June 1-4, 2013

ISA Product Showcase
San Diego, CA

A full line of blades designed to cut and finish rolls of paper, film and foil, corrugated materials, textiles and abrasives down to size is available from Hyde. Our Score Slitter Blades, complemented by a line of Perforator Blades for finishing products, are engineered to provide clean cuts consistently when taking materials down to sheets.

Also known as "crush cutters", Score Slitter Blades convert rolls of materials into sheets or smaller sections via a crushing versus cutting action. These blades are designed to exacting Original Equipment Manufacturer (OEM) specifications for replacement on machinery brands such as Appleton, Arpeco, Arrow, Ashton, Baldwin-Gregg, Cameron, Coretech, Didde-Glaser, Dusenbery, Goss, Johnstone, Kidder, Schreiber, Tidland and Western Gear among others.

Manufactured most commonly of 52100 steel, an extensive array of blades in a variety of outer and inner diameters, thicknesses and angles are available in stock. These blades can be also constructed of other alloys such as D2, M2 and stainless steel.

For a limited time only, Hyde is offering our in stock inventory of fresh water seafood processing blades at a 15% discount off list price! All blades are new and designed for use in fresh water processing operations only. Available in limited quantities in sizes ranging from 120 mm to 250 mm in diameter, these blades employ proprietary manufacturing processes that impart a low or "smooth" Ra micro finish to provide excellent corrosion resistance to the conditions found in freshwater seafood plants. This finish reduces friction during the cut and reduces the tendency of fish and waste products to stick to the blade. Cleaner blades last longer and cut more efficiently producing more yield and less waste. Act now before the inventory is fished out. First come, first served!

For more information and details on these blade specials, sizes and costs, **call us at 800-872-4933** or [visit us here](#).

CONGRATULATIONS:

HYDE TOOLS NAMES PAT SPINELLI PLANT MANAGER

Patrick S. Spinelli has been named Plant Manager at Hyde. The selection recognizes Pat's long-time contribution to manufacturing excellence through Lean and Continuous Improvement practices. He has overseen the operation of many departments and business units since joining Hyde in 1994 as a machine operator in the Engineered Products business unit. Pat was responsible for the planning and procurement of new machinery, schedule implementation, the development and implementation of budgets, team-building exercises and training. He later added the management of the heat-treating department, the laser cutting area and the production of Wilson machine knives and blades to his roles. In 2009, he was selected as leader of operations for the Industrial Blade Solutions (IBS) division. In this role he collaborated with the sales and marketing team to facilitate growth of the division while maintaining control of all manufacturing departments.

Reach out and say hello to Pat at pspinelli@hydetools.com

JOIN US:

HYDE IBS COMES TOGETHER AT FIRST IPPE SHOW IN ATLANTA

Join us as we exhibit at the inaugural International Production and Processing Expo (IPPE) in Atlanta, January 29-31, 2013. This expo brings together the former IPE,

IFE, and AMI's IME tradeshow in 2013, under the IPPE umbrella name. IPPE will bring together over 1,000 exhibitors and an anticipated 25,000 attendees. Visit us in booth #6745 to view our full line of blades for food, poultry, red meat, pork and seafood processing. Hope to see you there!

For more show info: www.ippe13.org

CUSTOMER FEEDBACK:

What would you like to see in the next issue? What do you think about the new look? Please feel free to share your feedback with us at info@hydeblades.com.
